Introduction

Results-oriented software engineer, passionate about designing user-focused web applications. Focused on designing experiences and developing effective solutions that improve the user experience and align with business objectives. I seek to contribute my creative problem-solving skills and experience to a collaborative development team.

Education

Computer Engineer at Facultad de Estudios Superiores de Aragón, UNAM. (2010 - 2014).

Computer Technician. UNAM (2008).

Experience

OCTOBER 2025 – CURRENTLY

Frontend Engineer. | Smart Payments Solutions SA de CV

Developed and maintained platform to manage payment terminals and merchant networks, as well as user profiles and operational logs, incorporating data analysis capabilities to improve decision-making. Implemented and enhanced reusable components within an internal library to ensure consistency and scalability across applications. Built reporting tools and dashboards to provide real-time visibility into system performance and business operations, improving monitoring and operational efficiency.

Technologies used: Angular, React, Javascript, Typescript, HTML, SCSS, NodeJs, Native Federation, Sonarqube Eslint, prettier, Jest, PrimeNg .

JUNE 2022 – JULY 2025

Senior Software Engineer. | Mercado Libre S de RL de CV

Analysis, design, development, and implementation of web systems for internal company use, tools, back offices, and CMS.

- Platform for managing tensors, which can be used to deliver data via online infrastructure (serving) or data sets to be consumed by machine learning models, using Microfrontends architecture.
- Platform for cataloging machine learning features to generate tensors and monitor the infrastructure created by a tensor.
- BackOffice for performing daily operations for some Cross teams in the area (data ingestion, report generation, data updates).
- Migration of a debugging system that allowed us to see the behavior of the data returned by the search engine from an old stack to the one currently used in the company.
- Resolution of web vulnerabilities in projects.
- Technical support for users of the developed systems.

Technologies used: React, Javascript, Typescript, HTML, SCSS, NodeJs, Webpack, Remote-Modules, Babel, Eslint, prettier, Jest, Java, Spring boot, Mockito, Junit, Python, Flask, Mysql, BigQuery, Figma, Mokups, Material UI.

JUNE 2017 – JUNE 2022

Fullstack Developer Ssr. | Technogi desarrollo y Consultoría de software S de RL de CV.

Comprehensive creation of customized web solutions, from requirements definition to production deployment for external clients.

- Mobile application for a dental insurance provider.
- Web platforms (B2C, B2B) for a dental insurance provider where AML concepts (KYC, CDD, EDD) and payment gateway integration were applied.
- CMS to feed cultural and entertainment events page.
- Website development for a cultural and entertainment events client.
- Creation and implementation of a payroll system for a company.
- Resolution of web vulnerabilities for projects.

Technologies used: React, Javascript, HTML, CSS, Bootstrap, Material UI, NodeJs, eslint, prettier, ReactNative, Angular, Ionic, MongoDB, Mysql, Loobpack, DJango, Mysql.

NOVEMBER 2016 – JUNE 2017

Web Developer Jr. | División de Universidad Abierta continua y a Distancia (DUACyD) de la Facultad de Estudios superiores Aragón UNAM.

Design, analysis, and construction of inventory and payroll systems for a Mexico City government agency in partnership with the Universidad Nacional Autónoma de México (UNAM).

- Analysis of user stories.
- Development of sequence diagrams and use cases.
- Database design.
- Migration of the payroll system from an obsolete stack to a modern stack.
- Migration of the inventory system from an obsolete stack to a modern stack.

Technologies used: AngularJS, JQuery, Javascript, HTML, CSS, Bootstrap, PHP, CodeIgniter, Mysql.

JULIO 2014 – NOVIEMBRE 2016

Web developer Jr. | Union DNC

Analysis, development, and fine-tuning of customized systems for external clients.

- Content management system for entering information on the public website of a civil society organization related to freedom of expression and transparency in Mexico City.
- Website related to freedom of expression and transparency of a civil society organization in Mexico City.

Technologies used: AngularJS, JQuery, Javascript, HTML, CSS, Bootstrap, PHP, CodeIgniter, Mysql.

JULIO 2014 – JUNE 2017

Teaching Assistant, Coordinator of Social Service Providers, Web developer Jr. |

Facultad de Estudios superiores Aragón UNAM (Community services department).

Design and creation of virtual platforms for internal use in the area related to first-year students entering the Faculty, coordinating, assigning tasks, support, and mentoring of social service providers.

- Virtual platform for preparatory monitoring activities for first-year students.
- Report generator with data entered into the virtual platforms.
- Management of activities for students performing social service.

Technologies used: AngularJS, JQuery, Javascript, HTML, CSS, Bootstrap, PHP, CodeIgniter, Mysql.

JULY 2014 – DECEMBER 2014

Social Service Provider | División de Universidad Abierta continua y a Distancia (DUACyD) de la Facultad de Estudios superiores Aragón UNAM.

Development of a digital school platform for open and distance learning students.

- Development of a virtual platform for use by open university students, where they could check grades, resources, classes, etc.

- Preventive and corrective maintenance of existing systems and computer equipment.

Technologies used: AngularJS, Javascript, HTML, CSS, Bootstrap, PHP, Sympohny, Mysql.

Skills

Effective communication.
Teamwork.
Time management.
Adaptability.
Resilience.
Problem solving.
Creativity.
Team leadership.
Working under pressure.

Certifications and courses

[AWS Certified Cloud Practitioner](#) (2021-2024).

[Software Architecture: Design Patterns](#)

Technical Skills

Frontend: HTML5, CSS3, SCSS, Bootstrap, Typescript, Javascript (React, Angular, NextJS, AngularJS, JQuery, React Native), Redux, Ionic, C#, Axios.

Backend: NodeJS (ExpressJS, NestJS, LoopBack.io), PHP (CodeIgniter, Symphony), Python (Django, Flask) C/C++, Java (Spring Boot).

Databases: SQL, MySQL, PostgreSQL, MongoDB, BigQuery.

Testing: React Testing Library, Jest, Nock, Junit, Mockito.

Tools: Git, Github, Bitbucket, Mercurial, npm, yarn, Jira, Postman, VSCode, Figma, DBeaver, Office (Microsoft, google), IntelliJIDEA, Moqups, Miro, Netbeans, Visual Studio, PgAdmin, PHPAdmin, Navicat, MySQL Workbench, SSH, FTP, SFTP.

DevOps: Docker, Docker compose, Kubernetes.

Cloud and monitoring: AWS, Datadog, Grafana, SonarQube.

Methodologies: REST APIs, MVC, OOP, Reactive/Event-Driven Programming, AJAX, JSON, XML.

Methodologies: REST APIs, MVC, OOP, Reactive/Event-Driven Programming, AJAX, JSON, XML.

Generative AI tools: Claude, Copilot, Cursor, ChatGPT.
